

Free Stuff at Napa-Vallejo Household Hazardous Waste Collection Facility ReUse Locker

Landscape • Auto • Cleaning • Home Repair • Paint

Why ReUse?

Hazardous materials are extremely expensive to dispose of and can pose long-term risks to the environment when landfilled or incinerated. HHW Facility workers help avoid these costs and risks by recovering some partially used products that residents drop off, like paints and cleaners, and setting them out for visitors to take home with them. These products may be just right for repainting that old fence or washing stains from the garage sink. Next time you drop off your hazardous wastes at the facility, why not stop by the Reuse Locker to see what we have in store for you? Reuse saves money and reduces risks to the environment!

Reduce Waste

These steps can help reduce disposal of hazardous waste:

- 1) **Try to buy the most effective product for the job.**
- 2) **Buy only the amount of product that you need in the short-term.**
- 3) **Store the product properly in its original container with label so it doesn't become unusable.**
- 4) **Use no- or low-toxicity products to minimize impacts on family, pets, and the environment.**
