

Non-recyclable items placed in recycling carts tangled into a massive 2240 lb. ball that shut down the sorting line at the Napa recycling facility!

Are you a wishful recycler and don't know it?

***Have you ever wondered what's
the problem with putting landfill
items into your blue recycling cart?***

Non-recyclable items are a **MASSIVE** problem that increase the cost of collections and processing at Napa's recycling facility. Plastic bags, fencing, cords, wires, or hoses can tangle in equipment and the sorting line, causing equipment breakdowns and risks of injury to workers.

You can help avoid these serious problems by being sure to keep non-recyclable items out of your blue cart. Please review the other inserts in this billing or visit www.naparecycling.com for details.
