

Curbside Food Composting

BEAT THE "ICK" FACTOR!

- Reduce moisture and odors in your pail or cart by adding soiled or shredded paper or wrapping your food scraps in newspaper.

- Keep your compost pail clean by using a 2 or 3 gallon compostable bag liner. Various local stores and online vendors sell compostable bags.
- Need a compost pail for daily collection of kitchen scraps? Stop by the Payment Center at 598 Lincoln Ave for a free pail — or reuse any appropriate-sized container that you have at home.

- Avoid odors, mold, and insects by washing your compost pail regularly (*it's dishwasher safe but the label may not survive*). It also helps to sprinkle baking soda or rub vinegar on the inside of your compost pail or cart lid.

- Don't have many yard trimmings, but still want to compost food scraps? Just contact Customer Service at 255-5200 to order a smaller brown cart.

For detailed information on the program, including a list of accepted items, please visit naparecycling.com/residential-food-composting.
